Developing
the Solutions
For You

Developing the Solutions For You

Since 1979 Certol® International has been leading the way in the development of infection prevention solutions for you and your facilities. Our development and testing ensure that we deliver the very best in cleaning technology for everything from surface disinfection to instrument cleaning and packaging.

Certol is an environmentally responsible manufacturer emphasizing use of biodegradable formulations. Certol follows Good Manufacturing Practices (GMP), and is FDA and EPA compliant. Our production and customer service departments are committed to customer satisfaction with exceptional guarantees.

Our partnerships with organizations like OSAP (The Organization for Safety, Asepsis and Prevention) keep us on the cutting edge of what is important to the infection control community. We feel that this support of ongoing education is paramount to our continued success.

Our customers use Certol products in a variety of healthcare settings including traditional dental practices and institutions. University of Colorado, UCLA, Baylor, University of Minnesota, and Indiana/Purdue are among our many loyal dental school customers.

A special thank you to
The University of Colorado School of Dentistry and
The Community College of Denver Dental Hygiene Program
for their kind assistance.

The ProSpray™ Family Products

All ProSpray products feature:

- A water based formula that won't crack, discolor or dry out vinyl and plastic surfaces.
- Intermediate level disinfection claims against TB, HIV, Staphylococcus aureus, Influenza A, Influenza B and other significant pathogens.
- Cleaning action great for use on keyboards, hand pieces prior to sterilization, switches, digital radiographic sensors and other electronics in the office.

ProSpray RTU™

Ready-to-use surface disinfectant spray

ProSpray wipes™

Surface disinfectant towelettes

ProSpray C-60™

Concentrated surface disinfectant solution

Certol[®]
Dental

Surface Disinfectants

All ProSpray disinfectant products feature:

- Cleaning and disinfection with one product. Meet CDC requirements for safe cleaning of blood and other human soils.^[1]
- Water based non-alcohol actives that will not stain, haze or crack plastics, tubing or vinyl.
- Broad spectrum antimicrobial activity against HIV, TB, Staphylococcus aureus, influenza virus and other significant pathogens.
- Excellent cleaning properties in the presence of blood and soils.
- Fresh lemon scent.

Three formats.
One reliable formula.

ProSpray™ wipes Surface Disinfectant/Cleaner Towelettes

- Reliable ProSpray formula with non-alcohol actives. Wipes stay moist longer.
- Protect people AND equipment: Reduce aerosols with ProSpray wipes.
- Ideal for disinfection around electronics, keyboards, digital radiographic sensors, and switches.
- Perfect for "high touch" surfaces in waiting areas implicated in transmission of the flu: door knobs, chairs, hand rails, and phones.
- Clean handpieces prior to sterilization.

Three Packaging Options:

- Original low-profile soft pack with large 9" x 10" wipe size; stores easily inside drawers.
- Economy canister offers 33 - 50% more wipes than major competitive brands.
- NEW tall high-capacity canister holds 135 extra-large 8-1/2" x 12" wipes. More than DOUBLE the competition.

See ProSpray wipes in action at:

Optional Squirt Cap	6	CAPSQUIRT-1

How to Use ProSpray Effectively

1. Clean first: Apply liquid ProSpray with sprayer or squirt top and 4 x 4's or paper towels.

or

Dispense sufficient ProSpray wipes. Wipe surfaces vigorously to remove all soils.

2. Discard used applicators or wipes.

3. Disinfect: Reapply liquid ProSpray to all surfaces for a 10-minute contact time.

or

Dispense fresh ProSpray wipes and reapply to all surfaces for a 10-minute contact time.

Technical Tip: Wipe surfaces with plain water and paper towels at least weekly.

Surface Disinfectants

Pathex™

60 Day Concentrated Surface Disinfectant/Cleaner and Holding Solution

Pathex is a concentrated broad spectrum disinfectant/cleaner.

Economical

- One bottle makes 30 liters of diluted solution.

Approved for 60 Day Use After Dilution

Safe and Pleasant to Use

- Water based formula recommended for all types of hard surfaces, including vinyls and plastics. Unlike alcohols, bleach or peroxides, Pathex will not degrade surfaces.
- Will not stain or bleach hard surfaces.
- Light lemon scent appreciated by staff and patients.

Versatile

- Detergents make Pathex an effective surface cleaner.
- Intermediate level disinfectant suitable for use when disinfecting surfaces contaminated with blood, saliva and related soils.
- Instrument holding solution and ultrasonic cleaner solution.

Available in Canada only.

Pathex Description	Case Qty	Order#
950 mL Bottle	12	PATHX32-1
System Kit - (4) 950mL bottles, (2) 16 oz. empty spray bottles, (2) squirt caps	1	PATHXSYS-1
16 oz. Empty Spray Bottle	6	PATHXSB-1

Evacuation Line Cleaner

ProE-Vac™

Liquid Evacuation System Cleaner

ProE-Vac is a non-foaming, biodegradable evacuation system cleaner that leaves a fresh mint scent. ProE-Vac's multi-action formula cleans and deodorizes the entire evacuation system.

Effective, Yet Gentle

- Regular use keeps tubing, piping and pumps free-flowing.
- Low pH dissolves mineral soils ensuring complete cleaning, yet is gentle to the evacuation system.

Quick Action

- Dissolves solid debris quickly.
- Rapid removal of organic tissue, fluoride gel, coagulated blood and impression material.

Safe for All Evacuation Systems

- Tested on metals and plastics commonly found in evacuation systems.

Tidy Tote: Convenient closed container for transporting solution between dental units. Special cap included is an adapter for both high volume and saliva ejector unit lines.

Non-foaming to protect pumps.

ProE-Vac Description	Case Qty	Order#
1 oz. Unit Dose - 24/box	6	PVACU24-1
1 Gallon with Pump	4	PVAC128-1
Tidy Tote™ - 1 Gallon Empty Dispenser	1	PVACB-1

ProEZ foam™ Ready-to-Use Foaming Enzymatic Spray

ProEZ foam is an easy to use instrument precleaning spray. Powerful quad enzyme formula quickly dissolves sticky blood soils while unique anti-corrosive system protects and brightens delicate metal surfaces.

ProEZ foam is especially valuable in the dental setting when soiled instruments must be held for extended periods of time. Simply spray cleaning foam on tray of instruments.

Long-lasting foam and corrosion inhibitors combine to provide effective cleaning that is safe for delicate instruments - even overnight!

ProEZ foam Description	Case Qty	Order#
24 oz. Spray Bottle	15	PREZF240-1
1 Gallon Refill	4	PREZF128-1

ProEZ 1™ Single Enzymatic Detergent

- Protease enzymes attack blood based soils.
- Most economical choice.
- Concentrated: One ounce makes one to two gallons of solution.
- May be used as holding solution or in ultrasonic cleaners.
- Neutral pH and safe for delicate instruments.
- Powerful surfactants added into the formula aid the enzyme cleaning action.
- Water softening and chelating agents work to prevent the minerals in your office tap water from interfering with the cleaning process and prevent corrosion on your valuable instruments.

Powerful single enzyme detergent attacks the most common protein soils.

ProEZ 1 Description	Case Qty	Order#
1 Gallon with Pump	4	EZ128-1

Instrument Cleaners

ProEZ 2™ Dual Enzymatic Detergent

- Extra enzyme cleaning power (protease and amylase).
- Ideal for heavier blood soils including oral surgery, periodontal instruments, jointed and tubular items.
- Available in economical gallons or convenient unit dose tubes.
- Concentrated: One ounce makes one to two gallons of solution.
- May be used as holding solution or in ultrasonic cleaners.
- Neutral pH and safe for delicate instruments.
- Powerful surfactants added into the formula aid the enzyme cleaning action.
- Water softening and chelating agents work to prevent the minerals in your office tap water from interfering with the cleaning process and prevent corrosion on your valuable instruments.

Get the most effective true dual enzyme detergent on the market.

ProEZ 2 Description	Case Qty	Order#
1 oz. Unit Dose - 24/box	6	PREZU24-1
1 Gallon with Pump	4	PREZ128-1

ProEZ AW Quad™ Quadruple Enzyme Automatic Washer Detergent

Premium Four Enzyme Cleaning Solution

- Four enzymes quickly dissolve blood and mucous soils.
- Ideal for oral surgery, implant and periodontal cases.
- Powerful anti-corrosive system protects delicate instrumentation, including carbon steel and burs.
- Economical - 1/2 oz. makes 1 gallon solution.
- Water softening and chelating agents work to prevent the minerals in your office tap water from interfering with the cleaning process and prevent corrosion on your valuable instruments.

Versatile 3-in-1 Formula

- Presoak or manual cleaning.
- Powerful ultrasonic cleaning action plus anti-corrosives to protect instruments.
- Effective evacuation system cleaner. Non-foaming to protect pumps. Neutral pH is recommended for amalgam separators.

Tidy Tote: Convenient closed container for transporting solution between dental units. Special cap included is an adapter for both high volume and saliva ejector unit lines.

ProEZ AW Quad Description	Case Qty	Order#
1 Gallon with Pump	4	PREZAW128-1
Tidy Tote™ - 1 Gallon Empty Dispenser	1	PVACB-1

Instrument Cleaners

Good Vibrations™ Ultrasonic Cleaner Solution

Effective Cleaning Action

- Supports ultrasonic cleaning action.
- Removes organic blood debris and inorganic dental materials such as cements.
- Non-foaming.

Protects Valuable Instruments

- Most effective anti-corrosive agents available.
- Enhances instrument appearance and shine.
- Safe for delicate surgical items and jointed orthodontic pliers.

Economical

- Concentrated formula.
- 1 ounce makes 1 gallon solution.

Clean and protect against corrosion with Good Vibrations.

Good Vibrations Description	Case Qty	Order#
1 oz. Unit Dose - 24/box	6	GVUS24-1
1 Gallon with Pump	4	GVUS128-1

Instrument Lubricant

ProLube™ RTU Instrument Lubricant Ready-to-Use

ProLube RTU is an innovative ready-to-use spray instrument lubricant. Apply to instruments after cleaning and before sterilization.

Lubricates and Protects Jointed Instruments

- Acts as an anti-corrosive and lubricating agent.
- Improves surface quality and shine.
- Maintains function of jointed items including forceps, scissors, hemostats and orthodontic pliers.

Innovative Lubrication Formula

- No shaking required. ProLube RTU is a true solution with no separation.
- Allows full penetration of steam sterilant.
- Non-toxic and no oily or sticky buildup.
- No rinsing necessary after application.
- Silicone free.

Eliminates Cross Contamination From Lubricant Dip

Ideal for jointed orthodontic pliers and forceps.

ProLube RTU Description	Case Qty	Order#
32 oz. Spray Bottle	15	PLR/32-1

Simplify Instrument Reproc

Instrument Precleaning:

With a busy schedule, contaminated instruments pile up. Are dried blood soils causing corrosion and more hand scrubbing?

Your Certol Solution:

ProEZ foam™

It's ready-to-use. Just spray over instruments and walk away. True quadruple enzyme formula will dissolve soils, reduce hand scrubbing and protect against corrosion - even overnight!

Liquid Presoak:

Delicate surgical instruments are contaminated with tough soils from oral surgery. Harsh alkaline detergents may pit and corrode delicate items.

Your Certol Solutions:

ProEZ AW Quad™

Premium four enzyme or ProEZ 2™ dual enzyme

Neutral pH detergents are gentle on instruments and tough on soils. Use as a liquid presoak or in the ultrasonic instrument cleaner.

Not sure which enzyme is right for you? Visit our helpful product guide at:

www.Certol.com/DentalEnzymes

Cleaning with Certol Products

Ultrasonic Instrument Cleaning:

Need to get the best cleaning performance from your ultrasonic cleaner? Trouble with corrosion on carbon burs and bladed items?

Your Certol Solution:

Good Vibrations™

Non-foaming and boosts ultrasonic cleaning action, while the powerful anti-corrosive system protects delicate instruments and burs.

Lubrication and Protection:

Ortho pliers, forceps, and other jointed items becoming sticky or corroded?

Your Certol Solution:

ProLube™ RTU

Just spray ready-to-use formula on jointed items after cleaning but before sterilization to lubricate and protect joints and box locks. It is totally non-toxic and needs no rinsing after application.

Excelle® Antiseptic Skin Cleanser 4% Chlorhexidine Gluconate Solution

Excelle is an economical antiseptic skin cleanser, comparable in features and active ingredient to Hibiclens®.

Highly Effective

- Rapid 15 second antimicrobial action.
- Persistence of action after initial handwash.
- Broad spectrum of action against transient microorganisms.

Versatile

- Use as routine handwash to ensure asepsis.
- Best choice for surgical hand hygiene.

Countertop Foam Dispenser

- Meets CDC recommendations for refillable containers.
- Light foam promotes thorough hand cleansing.

**4% chlorhexidine gluconate -
the gold standard for surgical hand
hygiene.** [2]

Hibiclens is a registered trademark of Mölnlycke Health Care AB.

Foam Handwash System - (2) 1 gallon, (4) 16 oz. empty foam dispensers, (1) funnel	1	EXCT1SYS-1

V-Cide® Chemical Vapor Sterilant Solution

V-Cide is a chemical sterilant formulated for use in Harvey® Chemiclave® sterilizers.

Reduced Odor

- Improved formula reduces odor-causing agents.

Gentle and Non-Corrosive

- Does not corrode, rust or dull instruments.

Economical

- Cost-effective alternative for your chemical vapor sterilizer.

Safe

- Compatible with materials recommended by manufacturers for sterilization in chemical vapor sterilizers.

**Formulated for use in Harvey®
Chemiclave® sterilizers.**

Harvey and Chemiclave are registered trademarks of Thermo Scientific.

V-Cide Description	Case Qty	Order#
Liter Bottle	16	VC338-1

ProView® plus Self Sealing Sterilization Pouches

ProView plus sterilization packaging provides dependable quality in eight sizes to meet a wide variety of packaging needs.

Consistent Performance

- Extra wide side seals, 36 lbs. high wet strength medical grade paper and five-ply blue poly film protect sterile contents.
- Industry leading 7/8" self-seal adhesive tape gives users three way seal: tape to tape, tape to paper and tape to film.
- Quality adhesive and materials provide clean peel.

User Friendly

- Thumb notch and generous knuckle roll area for easy opening.
- Quick release tape and dry edge enables handling with gloves.
- Adhesive strip with perforated fold gives quick complete seal.

Versatile

- Recommended for use in steam, chemical vapor and gas sterilization processes.

ProView plus Description	Case Qty	Order#

(All sizes 200/box)		

ProPak™ Nylon Sterilization Tubing

ProPak Nylon Sterilization Tubing is made of durable, transparent nylon sterilization film. It is used to maintain sterility of instruments and is ideal for steam and dry heat processes.

Versatile

- Three widths.
- Box may be used as a dispenser.
- Cut to desired length.

Chemical Indicator

- Built-in indicator changes color, verifying instruments have been processed.

Ideal for dry heat processes.

ProPak Description	Case Qty	Order#
Nylon Sterilization Tubing - 2" x 100'	12	SFR021-1
Nylon Sterilization Tubing - 3" x 100'	12	SFR031-1
Nylon Sterilization Tubing - 6" x 100'	6	SFR061-1

Sterilization Monitors

Technical Tip

Sterilization Quality Assurance: ProChek S Identifies "Cold Spots"

Most dental offices use traditional gravity displacement steam sterilizers. They are economical and generally reliable. However, they are prone to "cold spots" due in part to trapped air. Overloading, unloading of hot, wet packages, and other operational errors also contribute to sterilization failures even when the sterilizer appears to be working correctly.

ProChek® S Steam Sterilization Integrators

ProChek S is a multi-parameter color change strip designed for safe use inside pouches and packs to monitor effective steam sterilization. The special ink is resistant to color change until multiple parameters for sterilization are achieved (exposure to sufficient steam moisture and heat over time).

- Meets CDC guidelines as an internal chemical integrator.
- Use ProChek S to monitor sterilization conditions inside thick surgery packs and large cassettes.
- Use at least one strip in every load. ProChek S provides sterilization process quality assurance between weekly spore tests.

"Multi-parameter internal chemical indicators are designed to react to two or more parameters of time, temperature and the presence of steam and provide a more reliable indication that sterilization conditions have been met." [1]

Technical Tip

Internal Chemical Indicators

- Use inside every package or pouch to ensure the sterilizing agent has penetrated the packaging material.

ProChek S Description	Case Qty	Order#
Steam Sterilization Integrators - 100/box	6	TSI440-1

Sterilization Monitors

ProChek® ID Indicator Tape

- Meets CDC recommendation for an external chemical indicator.
- Indicator stripes on tape turn from white to black in steam.
- Dual use: Seal sterilization packaging and cassette wrap, and provide an external indicator.
- Choice of three widths to meet all packaging needs.

The CDC recommends a combination of monitors to ensure effective sterilization: "Monitoring of sterilization procedures should include a combination of process parameters, including mechanical, chemical and biological." [1]

ProChek ID Description	Case Qty	Order#
Steam Sterilization Indicator Tape - 1/2" x 60 Yards	12	PIT120-1
Steam Sterilization Indicator Tape - 3/4" x 60 Yards	12	PIT340-1
Steam Sterilization Indicator Tape - 1" x 60 Yards	6	PIT100-1

ProChek® ID Indicator Strips for Steam and Chemical Vapor

"Internal chemical indicators should be used inside each package to ensure the sterilizing agent has penetrated the packaging material."

- Meets CDC recommendation for an internal chemical indicator.
- Economical single parameter indicator - include a strip in every pouch.
- Temperature sensitive indicator ink turns from white to black in steam process; from white to brown in chemical vapor.
- Strips may also be used in open, unwrapped loads.

ProChek ID Description	Case Qty	Order#
Process Indicator Strips - Steam and Chemical Vapor - 250/box	6	SM4340-1

ProChek® ID Indicator Labels for Dry Heat

- Easy to use peel and stick labels.
- Designed for use as an external indicator on nylon tubing and packaging.
- Indicated for use in dry heat sterilization.
- Indicator turns from green to black.

ProChek ID Description	Case Qty	Order#
Indicator Labels - Dry Heat - 250/box	6	DHS006-1

Technical Tip

External Chemical Color Indicators

- Use on packaging when the internal indicator is not visible.
- Helps prevent the accidental use of packages and items not exposed to the sterilization process.

Disposables

ProTray™ Disposable Instrument Trays

ProTray disposable trays are rigid disposable instrument trays with a smooth, glossy finish. They prevent cross-contamination, save time and function as an alternate work surface for mixing, one-handed needle recapping and storage.

Saves Time

- Eliminates the time consuming process of manually cleaning and disinfecting reusable trays.

Peace of Mind

- Provides patients and staff a clean instrument tray to help prevent cross-contamination.

Versatile

- Can be used as an alternate work surface in place of separate mixing pads, amalgam wells and dappen dishes.

Environmentally Safe

- Contains no chlorofluorocarbons (CFCs).

Staff time = Money. Protect your wallet with disposables.

ProTray Description	Case Qty	Order#
Divided Setup Tray - 9-1/2" x 13-1/4" - White - 200/box	1	DT-00W-1
Flat Hygiene Tray - 8-3/8" x 10" - White - 125/box	1	DT-01A-1
Flat Utility Tray - 9" x 12-3/4" - White - 125/box	1	DT-03W-1

Pro Tector® Infectious Waste Bags

Pro Tector Infectious Waste Bags are bright red waste bags constructed of heavy-duty polyethylene with the universally recognized biohazard symbol.

Convenient

- Packaged in pre-folded dispenser boxes.

- Easy storage and distribution.

Meets State Regulations

- Impact resistance of 165 grams.
- Tearing resistance of 480 grams.
- Meets ASTM D-1709-91 and ASTM D-1922-89 standards.

Meets stringent New York and Florida state "red bag" standards.

Pro Tector Description	Case Qty	Order#
Small - 24" x 24" - 100/box	1	PW1501-1
Medium - 24" x 33" - 100/box	1	PW1505-1
Large - 30" x 43" - 50/box	1	PW2010-1

Pro Tector® Needle Sheath Prop

Pro Tector Needle Sheath Prop is a disposable device intended to promote safe one-handed recapping - the technique recommended by OSHA and the CDC.

- Secures cap on tray.
- Disposable and economical.
- Protects during disassembly.
- Autoclavable for one time use on sterile tray set-up.

For step by step illustrated directions, go to:
www.Certol.com/ProTectorHTU

CDC recommendations:
Use "a mechanical device designed for holding the needle cap to facilitate one-handed recapping."^[1]

Pro Tector Description	Case Qty	Order#
Needle Sheath Prop - 100/box	10	PNS100-1
Needle Sheath Prop - 500/box	6	PNS500-1

How to Use Pro Tector Needle Sheath Prop

1. Assemble syringe with anesthetic and capped needle as usual.

2. Holding assembled syringe, insert cap through hole in Needle Sheath Prop, aligning ridges of needle cap with grooves around hole.

3. Insert needle cap through hole up to collar of cap.

4. Hold onto cap behind Pro Tector Prop and pull cap off.

5. Place Pro Tector Prop on tray with open end of cap facing up.

6. Use one-handed technique to recap. Insert needle into cap; bring syringe vertical, push down slightly.

ProBarrier™ disposa chain™ Disposable Bib Chain

Metal bib chains and clips can give patients “chills”, tangle in their hair, and even spread infection! Disposable bib chains eliminate all three of these problems. ProBarrier disposa chain features:

- Soft cloth construction for patient comfort.
- Equal length to standard chains (16”).
- Strong adhesive tabs hold bib securely in place.
- Economical choice for bib holder at less than 6¢ per chain (MSRP).

Eliminate germs, make-up, sweat, and splatter with disposa chain!

ProBarrier disposa chain Description	Case Qty	Order#
Disposable Bib Chain - 3/4" x 16" - 300/box	10	DC-0115S-1

Shield™ High-Efficiency Face Mask

Shield is a disposable pleated surgical face mask with a flexible nose piece and chin piece that enable the mask to conform to the face creating a positive facial lock (PFL).

- Excellent filtration certified by independent lab testing: Particle filtration = 99% at 0.1 micron.
- Positive facial lock eliminates “blow by” - the passage of particles around edges of mask.
- Fluid resistant, comfortable, and latex-free.
- Available in earloop or retention head band.

CDC guidelines state: “Change masks between patients or during patient treatment if the mask becomes wet.” [1]

Shield Description	Case Qty	Order#
PFL Earloop - 50/box	6	PFLEL8-1
PFL Retention Head Band - 50/box	6	PFL008-1

ProBarrier™ Environmental Surface Barriers

ProBarrier covers meet the asepsis challenge of clinical contact surfaces (areas frequently touched during patient treatment).

- Reduces turn-over time between patients.
- Protects expensive equipment.
- Reduces exposure to disinfectant chemicals.
- Visible reassurance to patients.

ProBarrier Tube Sox are also an economical and effective cover for digital radiographic sensors.

ProBarrier Description	Case Qty	Order#
Chair Sox - 29" x 30" - 200/box	5	BB-2930C-1
Tube Sox - 3" x 12" - 500/box	6	BB-0312H-1
X-Ray Sox - 5" x 28" - 250/box	10	BB-0528X-1

Chair Sox™

Chair Sox provide surface protection for upholstered surfaces such as patient exam chair and doctor's stool. Also ideal coverage for delivery arms, keyboards and other surfaces.

Tube Sox™

Tube Sox provide surface protection for hard to clean unit hoses and attachments such as saliva ejectors and air/water syringes. Constructed with a 1" lip-guided entry-way to facilitate loading and with an adhesive strip to tack barrier into place.

X-Ray Sox™

Custom designed, stream-lined fit for x-ray heads. An adhesive strip and receiving tape hold barrier in place.

Customer Satisfaction Guaranteed

Certol International, LLC has been manufacturing top quality, dependable infection prevention products for over 30 years. We pride ourselves on the consistent level of professionalism in every product we sell.

Our Customer Service Department will provide you with complete infection prevention methodology and product information, and help you achieve perfection in your techniques. Call 1-800-THE-EDGE (1-800-843-3343). Our staff is available weekdays from 7:00am - 5:00pm (MST) to answer your questions.

We can also be reached at www.Certol.com. Our website provides in-depth infection prevention procedures and Material Safety Data Sheets for all Certol products.

Certol is not only committed to providing high quality products and the complete satisfaction of our customers, Certol ABSOLUTELY GUARANTEES IT. If the end user of any Certol product is not completely satisfied with the quality of the product, a refund or adjustment of equal value will be made. For a copy of any of Certol's product warranties call 1-800-THE-EDGE (1-800-843-3343).

Ordering Information

- Product sold in minimum of case quantities only.
- For international orders, please contact Customer Service for specific terms and conditions.

Shipping Information

- Per customer routing instructions: Collect, Prepay and Add (PPA), or Air (PPA).
- LTL orders - \$20.00 handling fee (PPA).
- Small package - \$2.00 per box handling fee (PPA).

Terms

Net 30 days. A service charge of 1.5% per month will be added to all invoices thirty days past due.

Return Policy

- A Returned Goods Authorization (RGA) must be obtained from Customer Service prior to a product return.
- Full cases only.
- Customer is responsible for return shipping.
- 25% restocking fee on all returned items.
- 14-month shelf life on products returned.
- 25% disposal fee on unsellable products.
- All product returns must be within six months of receipt of goods. Credit memos issued will expire after six months.

All Certol products are available at these fine distributors, and many more!
Please visit www.Certol.com/DentalDistributors for the complete list.
