## Graffiti Remover

### Description:

A unique blend of non-petroleum ingredients formulated to effectively remove nearly all types of graffiti and much, much more. Does not contain methylene chloride or petroleum distillates. Manufactured with natural solvents. Rated the best by the Massachusetts Bay Transportation Authority for its cleaning effectiveness. Will not damage concrete, bricks or cinder blocks.

### Intended Use:

Safely removes oil base, latex and enamel paints, lipstick, crayon marks, wax, shoe dye, markers, including sharpies, gum and adhesives from a multitude of smooth and porous surfaces including painted surfaces, glazed brick, metals, baked enamels, granite, tiles, aluminum, ceramics, glass, most plastics, bricks, stone, cinder block, concrete, fabric, etc.

### Great to Use:

- Community walls and cedar fences.
- Schools.
- Passenger and cargo transit systems.
- Bridges and underpasses.
- Playground systems.
- Sidewalks, concrete driveways and floors.
- Remove tough stains from clothing (test for color fastness).
- And many other uses!

### Product Specifications:

pH: 6.5 - 7.5  
Shelf Life: 5 years.  
Appearance: Clear liquid.  
Odor: Citrus.

### Product Capabilities:

Controlled stripping action makes Remover Magic Graffiti Remover ideal for removing only the undesirable marks.

### Disposal:

The residue from materials removed when cleaning with this product may be considered a hazardous waste. Dispose according to all local, state, and federal regulations.

### Use Precautions:

Local exhaust as necessary to eliminate vapors. Mechanical exhaust is not normally required unless used in a confined area and/or individual has a sensitive respiratory system. Neoprene or solvent resistant gloves, eye protection and protective clothing are recommended.

For specific technical and safety information, including MSDS, please visit the Certol website: <http://www.certol.com/industrialmsds.aspx>

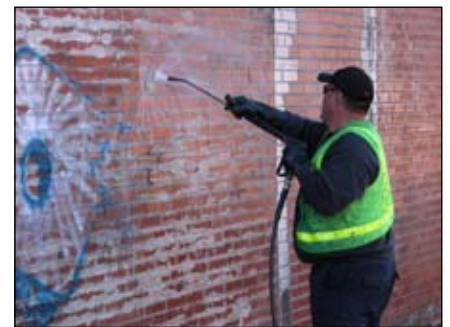

### How to Use Remover Magic:

1. Wipe, brush or spray with solvent resistant sprayer onto desired surface. Allow to sit 30 - 60 seconds for smooth surfaces, 2 - 3 minutes for porous surfaces.

2. Wipe off with colorfast cloth. Steel brush may be necessary on porous surfaces.

3. Rinse thoroughly with water. If ghosting occurs, repeat steps 1 - 3.
