

How to Use

BOAT Magic®

The User Friendly Hull and Outdrive Cleaner!™

Cleaning Fiberglass and Steel Hulls

BOAT Magic is the most effective way to clean and remove marine stains and discoloration from most boat hulls and bottoms. Different applications require different methods and dilutions.

READ INSTRUCTIONS IN THEIR ENTIRETY BEFORE PROCEEDING.

PRECAUTIONS:

- **BOAT Magic is not recommended for use on lightweight aluminum hulled boats.**
- While using BOAT Magic, protective eyewear and gloves are always required.
- **Active ventilation is required when working indoors.**
- Plastic should be used to cover the boat trailer to reduce the risk of corrosion to the trailer.
- **ALWAYS treat an inconspicuous area of the surface to be cleaned to check for compatibility.**
- **When diluting, ALWAYS add the BOAT Magic to water, NOT water to the BOAT Magic. This eliminates the potential of an unwanted reaction that may cause dangerous splashing to occur.**
- DO NOT dump BOAT Magic into lakes, rivers, oceans, or other bodies of water.
- Collect wastewater and dispose according to all local, state, and federal regulations.

CLEANING FIBERGLASS, PAINTED STEEL AND RUBBER HULLS:

DILUTION:

- For best results on heavy stains, use full strength. On lighter stains, dilute no more than 1 part BOAT Magic to 2 parts water.

APPLICATION:

- Apply with acid resistant spray bottle (plastic) or pour into a plastic bucket and use a natural, soft bristle brush or plastic scouring pad. Avoid using nylon, synthetic or metal applicators.
- Softly scrub hull surface with a natural, soft bristle brush or plastic scouring pad, if necessary, to remove especially stubborn stains. Use caution not to scratch painted surface.
- Let BOAT Magic solution dwell on surface 30 - 60 seconds to allow solution to penetrate, then rinse thoroughly.
- Repeat if necessary.

NOT RECOMMENDED FOR USE ON LIGHTWEIGHT ALUMINUM BOAT HULLS

BOAT Magic is not an algaecide or molluscicide and is not intended to repel or control the growth of algae or marine life.
