

# ProChek® ID

## Indicator Labels for Dry Heat

**Unprocessed**

**Processed**

### Peel-and-Stick Labels

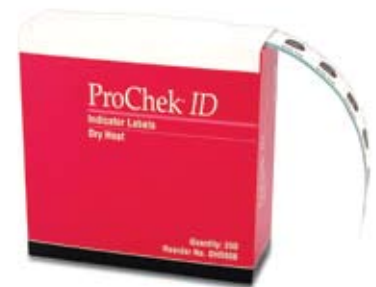

- External indicator.
- Specifically designed for use on nylon pouches or tubing.

### Easy to Interpret

- Indicators turn from green to black to distinguish processed from unprocessed pouches or tubing.
- Alerts user to possible sterilizer malfunction.

### Easy to Use

- Box serves as a dispenser.

### Monitor Every Package

ProChek ID Process Indicators are designed to be placed on every package that goes through the dry heat sterilizer to demonstrate that processing has occurred. The indicator ink is temperature sensitive and changes color to easily identify processed from unprocessed packages.

## Dry Heat Indicator Labels

### Description:

ProChek ID Dry Heat Indicator Labels are designed to be utilized in dry heat (hot air) sterilizers. The dry heat label will alert the user to possible sterilizer malfunction or personnel error.

### Intended Use:

ProChek ID Dry Heat Labels provide clear identification of processed and unprocessed items. When used as directed, ProChek ID labels give visible confirmation that the item has been exposed to dry heat.

### Recommended Use:

ProChek ID Dry Heat Labels should be used in or on every package that goes through the dry heat sterilization process.

### Product Specifications:

Dimensions: 3/4" x 1-5/16"  
Parameters: Measures exposure to minimum temperature of 320°F (160°C).  
Indicator Ink: Indicator ink specific to dry heat process.  
Adhesive: Permanent, heat resistant adhesive.

### Product Capabilities:

Under dry heat conditions, ProChek ID's light green indicator bar turns black.
