ProTouch® vinyl Vinyl Examination Gloves

Description:

ProTouch vinyl examination gloves are high quality gloves designed to conform to fingers, palm and wrist with a comfortable, snug fit. They are non-sterile, ambidextrous, and powder-free.

Intended Use:

ProTouch vinyl gloves provide protection against bloodborne pathogens for practitioners or patients sensitive to latex.

Product Specifications:

Material: Vinyl.
Finish: Matted/bisque.
Color: Sheer white.
Odor: Clean, fresh scent.
Packaging Sizes: 100 pair per box, 10 boxes per case.

Product Capabilities:

ProTouch vinyl gloves provide increased touch sensitivity, assuring maximum tactile response and superior durable strength. ProTouch vinyl is made of high quality, exceptionally elastic vinyl which increases comfort and fit.

The ambidextrous design allows for fatigue-free comfort and optimum fit without finger pull or radial bind.

The tough, beaded wrist cuff prevents roll-down and provides reinforcement for the glove, allowing for easier donning.

ProTouch vinyl's matted/bisque finish provides safe, secure, non-slip, wet gripping control during even the most delicate and demanding procedures.

ProTouch vinyl examination gloves are made of a polymer compound that is ideal for mixing impression materials, as they will not inhibit the impression material from "setting up."
